### Document Body

We need to prepare a response to the letter attached below. I do not have a hardcopy of the letter, nor any earlier email with it attached, but we should reply as soon as we can. I did find an email from NOV 08 indicating Sara (then Greiner) was working on this same general topic. I do not know that we ever sent a letter back then. I will forward that message to you as well. Please read through the November email and this current request and try to figure out what is going on. Talking to Carl may help as well. Hopefully the work Sara did earlier addresses the issue and we just need to respond. In any case, once you have looked into this, please schedule some time with me and we can decide how to proceed.

Thanks,  
Doug

Subject: JCO Bioassys

Carl,

I believe you forwarded our letter (see attached) on to the permitting folks. We have not received a reply and need to finalize our approach before the September sampling.

The February bioassay testing went fine and the report is in the mail to you.
